

Homicides in Florida

SURVEILLANCE DATA: 2013

FLORIDA INJURY PREVENTION

www.floridahealth.gov/injury

In 2013, homicides were the second leading cause of death among Florida residents ages 1-4 & 15-24.

In 2013, there were 1,143 homicides & 4,719 hospitalizations for non-fatal assault-related injuries.

Violence Prevention in Communities.

The World Health Organization Recommends 10 Key Strategies:

FOSTER STABLE RELATIONSHIPS

1. Help to increase safe, stable and nurturing relationships between children, their parents and caretakers.
2. Help improve life skills and enhance opportunities for children and youth.
3. Promote gender equality and empower women.

THESE STRATEGIES ARE:

Scientifically credible.

Can potentially impact multiple forms of violence.

Represent areas where communities can make reasonable investments.

CREATE POSITIVE AVENUES FOR SUCCESS IN LIFE

4. Reduce access to lethal means.
5. Reduce availability and misuse of alcohol.
6. Change cultural norms that support violence.
7. Improve criminal justice systems.
8. Improve social welfare systems.

PROMOTE SOCIAL HARMONY

9. Reduce social distance between conflicting groups.
10. Reduce economic inequality and concentrated poverty.
